

**CPCRN-RELATED PRESENTATIONS AT THE 11TH ANNUAL CONFERENCE
ON THE SCIENCE OF DISSEMINATION AND IMPLEMENTATION IN HEALTH (DECEMBER 3-5, 2018)**

MONDAY, DECEMBER 3RD

1:30 pm-3:00 pm

*Mount Vernon
Square A*

Accounting for organizational context in dissemination and implementation science – A rationale and guidance***

Speakers: **Sarah Birken**, University of North Carolina at Chapel Hill
Jennifer Leeman, University of North Carolina
Martin Charms, Boston University School of Public Health
Michael I. Harrison, Agency for Healthcare Research and Quality

Workshop

Learning Objectives:

1. To provide a rationale for accounting for organizational context in dissemination and implementation science (e.g., to promote scale-up).
2. To illustrate how three to four organizational theories might be used to account for organizational context in dissemination and implementation science and strategies that may be effective at promoting all stages of the implementation life cycle (e.g., adoption, implementation, and scale-up).
3. To engage participants in an exploration of how they have or might have accounted for organizational context to advance their dissemination and implementation science.
4. To provide resources to investigators for addressing organizational context in dissemination and implementation science.

Description: This workshop is based upon the paper “Organizational theory for dissemination and implementation research,” which was written to stimulate and provide guidance on the addressing of organizational context in dissemination and implementation science. During the workshop, presenters will discuss the rationale for addressing the organizational context in dissemination and implementation science, offer guidance for doing so in a way that acknowledges interactions among organization-level constructs and constructs that lie at other levels, and discuss resources to help dissemination and implementation scientists address the organizational context.

*Congressional
B*

Reporting on implementation strategies for increasing the uptake of evidence-based interventions***

Speakers: Byron Powell, University of North Carolina at Chapel Hill
Maria E. Fernandez, University of Texas School of Public Health
Prajakta Adsul, National Cancer Institute

Workshop

Learning Objectives:

1. Understand the importance of studying implementation strategies in the context of implementation science, the underlying mechanisms, and learn how to report them
2. Review the selection of relevant strategies and use of implementation strategies in the context of cancer control and prevention research
3. Discuss the challenges in research on implementation strategies

Description: Participants will be introduced to the concept of implementation strategies, which are the specific means or methods for adopting and sustaining evidence-based interventions. Efforts have been made to categorize and list implementation strategies used in the context of health research. Using this list, we will conduct an interactive exercise to highlight the importance of precisely describing and reporting implementation strategies. We will review how implementation strategies have been reported in cancer prevention and control studies and conclude with a discussion on how others have reported and discuss an agenda for research related to implementation strategies.

**CPCRN-RELATED PRESENTATIONS AT THE 11TH ANNUAL CONFERENCE
ON THE SCIENCE OF DISSEMINATION AND IMPLEMENTATION IN HEALTH (DECEMBER 3-5, 2018)**

MONDAY, DECEMBER 3RD

1:30 pm-3:00 pm (continued)

Mount Vernon
Square B

Role of behavioral economics and implementation economics in increasing screening for chronic conditions***

Speakers: **Florence Tangka**, Centers for Disease Control and Prevention
Sujha Subramanian, RTI International

Workshop

Learning Objectives:

1. To learn how behavioral economics can inform the design and implementation of interventions to increase prevention and screenings for chronic conditions
2. To use real-world examples to explain behavioral economics and implementation economics approaches
3. To provide insights from implementation economics about effective and cost-effective policies and interventions to address the chronic disease burden
4. To highlight research gaps in behavioral and implementation economics

Description: Behavioral economics and implementation economics are emerging fields. Behavioral economics interventions (e.g., financial incentives, choice architecture modifications, commitment devices) target modifiable risk factors to improve patient and provider engagements in evidence-based recommendations. Implementation economics, a sub-discipline of implementation science, focusses on the cost, cost-effectiveness and cost-benefit of public health programs. Both behavioral and implementation economics can offer important insights about effective and cost-effective policies and interventions to address the chronic disease burden, especially among underserved populations. During this workshop, presenters will provide real-world examples and lessons learned that can help attendees improve implementation and evaluation of their interventions and programs.

3:15 pm-4:45 pm

Meeting Rooms
10/11

Application of the CFIR in Low- and Middle-Income Health Settings***

Chair: Sarah Gimbel, University of Washington

Track: Global Dissemination & Implementation Science

This session focuses on the application of the consolidated framework for implementation research in low- and middle-income countries (LMICs). Presentations in this session include a systematic review of the use of CFIR in LMICs, as well as two examples of its application, one in the context of mental health and the other in the context of vaccine coverage.

- [Evaluating applications of the consolidated framework for implementation research \(CFIR\) in low- and middle-income country settings](#)

Implementing Evidence Based Practices with Underserved Populations: The Role of Clinicians

Track: Promoting Health Equity and Eliminating Disparities

Discussant: Charlene Pope, Ralph H. Johnson Veterans Affairs (VA) Medical Center

Chair: Jennifer Alvidrez, National Institute on Minority and Health Disparities

Successful implementation of evidence-based practices with diverse populations requires addressing acceptability and feasibility of these practices from the clinician's perspective. This session focuses on strategies to enhance the capacity of clinicians to deliver evidence-based practices with diverse and underserved patient populations, including racial/ethnic minority, low-income, and rural individuals and families.

- [Integrating a mental health innovation within the nurse family partnership program: How we developed the innovation with scale-up in mind***](#)

Linda Beeber, PhD¹, Alasia Ledford, MDiv, BA, BSN, RN¹, **Jennifer Leeman, DrPH, MDiv²**, Paula Zeanah, PhD³, Sharon Sprinkle⁴, Mariarosa Gasbarro, MA⁵ and Joan Loch⁶, (1)University of North Carolina at Chapel Hill, Chapel Hill, NC, (2)University of North Carolina, Chapel Hill, NC, (3)South Louisiana School of Nursing, Lafayette, LA, (4)Nurse Family Partnership, Greensboro, NC, (5)University of Colorado, Aurora, CO, (6)Nurse Family Partnership, Scranton, PA

**CPCRN-RELATED PRESENTATIONS AT THE 11TH ANNUAL CONFERENCE
ON THE SCIENCE OF DISSEMINATION AND IMPLEMENTATION IN HEALTH (DECEMBER 3-5, 2018)**

MONDAY, DECEMBER 3RD

3:15 pm-4:45 pm (continued)

Congressional B **Novel Methods for Implementation Research** Track: Models, Measures, and Methods
Chair: Megan McCullough, Boston University
Implementation science requires complex interventions that can respond to variability across contexts and over time. Because contexts and actors are themselves dynamic, researchers require methods and tools to rapidly synthesize information in order to select implementation strategies, adapt to emergent findings, enable feedback, and identify the active ingredients of successful implementation efforts. This session highlights novel methods and tools with pragmatic utility for implementation science, with examples of their use in the field, and implications for improving both the rigor and efficiency of implementation research.

- [Qualitative research in implementation science \(the QUALRIS project\): Meeting the challenges](#)***
Suzanne Heurtin-Roberts, MA, PhD, MSW, National Cancer Institute, Rockville, MD, Deborah Cohen, PhD, Oregon Health & Science University, Portland, OR, Benjamin Crabtree, PhD, Rutgers Robert Wood Johnson Medical School, New Brunswick, NJ, Laura Damschroder, MS, MPH, VA Ann Arbor Healthcare System, Ann Arbor, MI, Deborah Padgett, New York University, New York, NY and Borsika Rabin, PhD, MPH, PharmD, University of California, San Diego, La Jolla, CA

5:00 pm-6:30 pm

Congressional A **Examining the Comparative Effectiveness of Different Implementation Strategies**
Track: Clinical Care Settings: System-level Interventions
Discussant: **Sarah Birken*****, University of North Carolina at Chapel Hill
Chair: Andrew Quanbeck, University of Wisconsin – Madison
Research comparing different implementation strategies is an important, yet still emerging frontier in implementation science. This session includes 4 studies using a range of study designs to compare implementation strategies.

Meeting Rooms 12/13/14 **Implementing Policy for Population Health** Track: Health Policy Dissemination and Implementation Science
Chair: Alex Ortega, Drexel University Dornsife School of Public Health

- [Identifying optimal approaches to scale up colorectal cancer screening: An overview of the centers for disease control and prevention \(CDC\)'s learning laboratory](#)***
Florence Tangka, PhD¹, Sujha Subramanian, PhD², Sonja Hoover, MPP³, Christen Lara⁴, **Casey Eastman, MPH⁵**, Becky Glaze⁶, Mary Ellen Conn, MS⁷, **Amy DeGross, PhD, MPH¹**, Faye Wong, MPH⁸ and **Lisa Richardson, MD, MPH¹**, (1)Centers for Disease Control and Prevention, Atlanta, GA, (2)RTI International, Waltham, MA, (3)RTI International, North Waltham, MA, (4)Colorado Department of Public Health & Environment, Denver, CO, (5)Washington State Department of Health, Olympia, WA, (6)HealthPoint, Renton, WA, (7)WVU Cancer Institute, West Virginia University, Morgantown, WV, (8)Atlanta, GA

WEDNESDAY, DECEMBER 5TH

8:15 am-9:45 am

Meeting Rooms **Improving Uptake of Cervical Cancer Screening and HPV Vaccination** Track: Prevention and Public Health
8/9 Discussant: **Heather Brandt*****, University of South Carolina
Chair: **Antoinette Percy-Laurry*****, National Cancer Institute
Utilizing implementation strategies in cancer prevention and early detection efforts is essential to improving the cancer burden in populations. This session examines various methods to improve or influence the uptake of HPV vaccination as well as the role of navigators and partnerships when developing and/or implementing programs to increase cervical cancer screening rates. Systems and provider support, predictors or barriers to uptake and navigation activities will be discussed.

- [Implementation support for HPV vaccination: Should we target clinic systems, provider behaviors, or both?***](#)

Mount Vernon Square B **Use and Measurement of Practice Facilitation** Track: Models, Measures, and Methods
Discussant: Lisa Saldana, Oregon Social Learning Center
Chair: **Suzanne Heurtin-Roberts*****, National Cancer Institute
Facilitation is a common element of implementation strategies, yet there is no consensus on how to systematically measure and assess the content, dose, and quality of facilitation. Such efforts are essential for identifying the fidelity, cost and impact of facilitation, and the implications for replication, scale-up, and sustainment. This session will feature four implementation studies that deployed different approaches to measuring, monitoring, and evaluating the work of facilitators across a variety of clinical and community settings.

10:00 am-11:30 am

Mount Vernon Square B **Achieving Health Equity in the Cancer Care Continuum** Track: Promoting Health Equity and Eliminating Disparities
Chair: Brenda Adjei
Significant health disparities persist the continuum of cancer care, including screening, diagnosis, treatment, and survivorship care. This session features implementation research on strategies to address racial/ethnic minority, socioeconomic, and geographic disparities across this continuum.

Chair: Brenda Adjei

- [Trends in NCI Dissemination and Implementation Research: Analysis of Health Disparity/Minority Health Grants***](#)
Dajah Swinton, MPH (c)¹, **Antoinette Percy-Laurry, DrPH, MSPH²**, Tanya Agurs-Collins, PhD, RD³ and Gina Tesaro, MSW³, (1)University of Alabama at Birmingham, Birmingham, AL, (2)National Cancer Institute, Rockville, MD, (3)Rockville, MD

Congressional C **Implementation Ingredients: Organizational Readiness, Facilitators and Barriers, and Strategies** Track: Promoting Health Equity and Eliminating Disparities
Chair: Rebecca Selove, Tennessee State University
Application of these overlapping and inter-related concepts will be discussed in the context of implementation of five different evidence-based programs: violence prevention in middle schools; workplace health promotion in low-wage industries; cardiovascular disease prevention in public health; clinical decision support for cancer prevention in primary care settings; and community-based promotion of healthy eating and physical activity in preschool children.

- [Is organizational readiness to change an effect modifier in an implementation trial of a workplace wellness program?***](#)
